

CEMENT & CONCRETE BATCHING PLANT SOLUTIONS

Chemical Products for your
Cement To Concrete Applications

POWER
CHEMICAL SERVICES

Adding Value in Every Part of a Concrete Life Cycle

Before the installation of concrete at construction sites, cement is first produced at cement plants, and then moved to batching plants to create concrete batches before transported to field applications. For both these pre concrete application processes, we have products that might just be the improvement you're looking for.

Our Cement Batching Solutions are a perfect fit for:

- Clinker Grinding Process in Cement Plant
- Dry and Wet Mix Batching Plant
- Stationary and Mobile Batching Plant
- Ready Mix and Precast Application

Our Chemical Products

POWERGRIND™ : Cement Clinker Grinding Aid

To increase cement grinding productivity, and also to produce uniform and homogeneous cement clinker from the grinding process, our **POWERGRIND cement grinding aid** is able to increase your cement/clinker grinding capacity via charge repulsion method.

Our **POWERGRIND™** product benefit :

- Increased production output for your clinker grinding process
- Increased lifetime of clinker grinding ball due to cleaner ball surface

POWERTARD™ : Retarder Admixture for Concrete

Ensuring stable concrete mix from batching plant to point of application can be tricky, our **POWERTARD Retarder Admixture** can be used to delay setting time to cover both short and long distance concrete transport duration.

POWERPLAST™ : High Range Water Reducer for Concrete (Superplasticizers)

Our Superplasticizers with its various chemistry & formulations Naphthalene, Melamine, or PCE are water reducing agents that can help increase your concrete's final strength and impermeability.
